## Motivation

The images.design provided resource intends for system customization. This resource is backed by the dictionary.system.resources.images dictionary. Items of this dictionary allow

Below are references for a supervisor user on how to configure the items of the dictionary.system.resources.images and requirements for files uploaded.

## Header logo

### Motivation

Typically, the header of the application screen should contain a logo picture of the National Regulatory Authority with a link to the web portal.

### The item of dictionary.system.resources.images

Items

System resources - Images

Save Remove Cancel

Name

01 Header logo

Additional information

SVG file to place in the left upper corner of the application's header

URL

resources.system.logo 1

Figure 1 The NRA logo

1. The URL should be resources.system.logo and can't be changed

configuration.resource.images

The link to the web portal is defined in the Administrative-Configuratuon-Messages feature. The key of the message is logo\_url

The screenshot displays the 'Administrative-Configuratuon-Messages' interface. At the top, there is a header bar with the Ministry of Health and Population logo and the text 'Ministry of Health and Population Department of Drug Administration'. Below the header, a navigation menu includes 'Administrate', 'Authorities and Users', 'Processes', 'Configurations', 'Import', 'System settings', and 'Exit'. The 'Messages' section is active, showing a table with two columns: 'Key(language)' and 'Message'. The table contains one entry with 'logo\_url' as the key and 'https://google.com' as the message. A modal window is open for editing this message, showing the 'Key(language)' as 'logo\_url' and the 'Message' as 'https://google.com'. The modal has 'Save' and 'Cancel' buttons.

Key(language)	Message
logo_url	https://google.com

Figure 2 The link to the NRA web portal

## The files uploaded

The files uploaded should be in SVG format. Please, file-tune the proportions.

configuration.resource.images

## Terms of use and privacy policy

### Motivation

The terms of use and privacy policy may depend on in-country legislation and should be defined in the national language.

### Items of dictionary.system.resources.images

#### Items

The screenshot shows a dialog box titled "System resources - Images". At the top, there are three buttons: "Save" (blue), "Remove" (yellow), and "Cancel" (white). Below these buttons, the "Name" field contains the text "02 Terms of use". The "Additional information" field contains the text "The customized terms of use in PDF format". The "URL" field contains the text "resources.system.terms". A small question mark icon is visible in the bottom right corner of the dialog.

Figure 3 Terms of use

#### Items

The screenshot shows a dialog box titled "System resources - Images". At the top, there are three buttons: "Save" (blue), "Remove" (yellow), and "Cancel" (white). Below these buttons, the "Name" field contains the text "03 Privacy policy". The "Additional information" field contains the text "The PDF file with the local privacy policy". The "URL" field contains the text "resources.system.privacy". A small question mark icon is visible in the bottom right corner of the dialog.

Figure 4 Privacy policy

The URLs should be resources.system.terms and resources.system.privacy respectively.

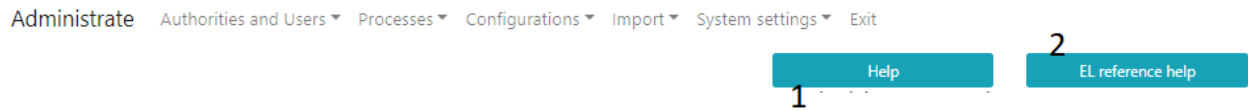

### The files uploaded

Should be in PDF format.

## Administrate online helps

### Motivation

The pages in the administrative feature typically contain buttons “Help” or similar that open provided online help in PDF format. For example, the Administrate-Configuration-Resources page contains:

1. How to create resource help
2. How to use EL expressions in docx files – reference guide

Any of such buttons opens a pdf file built into the executable module of the software. Sometimes it may be useful to adapt these provided help files to the particular in-country SOPs and/or translate them to the local language.

### Items of dictionary.system.resources.images

For each help file may be added items to the dictionary. The URL field should be set to the URL provided in the upper of a page of the original help file

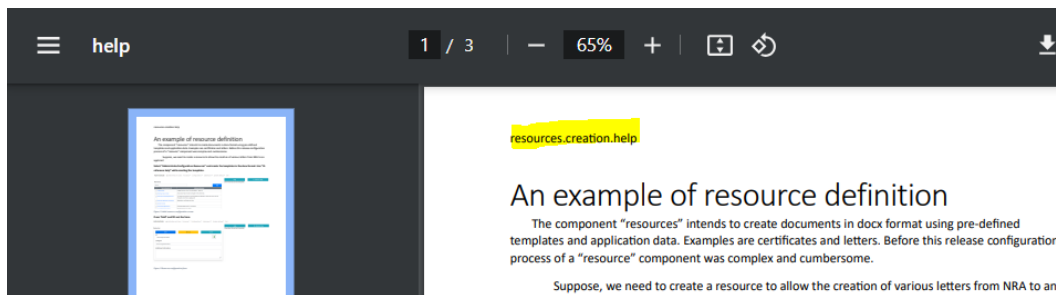

Figure 5 The provided system help file

In the example above the URL field in the item of the dictionary should be resources.creation.help

### Files uploaded

Should be in PDF format.

## Application online help

### Motivation

The application forms may be complex. It will be a good idea to provide online help.

### Items of dictionary.system.resources.images

Should contain the URL field exactly as the application data URL.

Administrate Authorities and Users Processes Configurations Import System settings Exit

Dictionary

dictionary.guest

New dictionary

	Name	Url	Additional information
<input checked="" type="checkbox"/>	Applications	dictionary.guest.applications	Applications (Guest) available for client which will be evaluated by the DDA
<input type="checkbox"/>	De-registration	dictionary.guest.deregistration	
<input type="checkbox"/>	Inspections by query	dictionary.guest.inspections	
<input type="checkbox"/>	Modifications	dictionary.guest.amendments	
<input type="checkbox"/>	Renew Registration	dictionary.guest.renewal	

100

Applications

Save Remove Cancel

Name

New Retail Pharmacy - Individually Owned

Additional information

Application for New Retail Pharmacy registration, where the pharmacy is owned by up to 5 individuals.

URL

retail.site.owned.persons

Application URL

application.retail.site.owned.persons

Data Configuration URL

retail.site.owned.persons

Checklist Dictionary URL

dictionary.application.pharmacy.new.init

### Items

System resources - Images

Save Remove Cancel

Name

Retail Pharmacy application - main page

Additional information

URL

retail.site.owned.persons

Figure 7 An item in the dictionary

### Files uploaded

Should be in pdf format.

## Application receipt customization

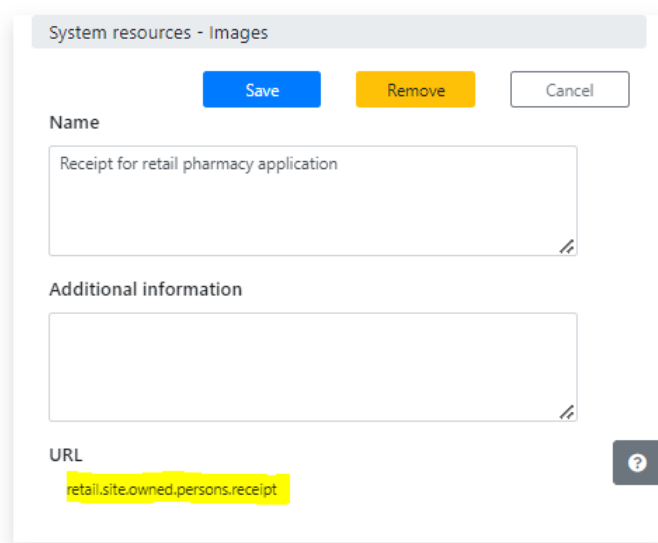

### Motivation

When an applicant applies to NRA, OpenRIMS creates a simple uniform receipt. In case, the legislation or SOPs require a customized receipt document, a Supervisor user can develop it using a docx document with EL expression included.

### Items of dictionary.system.resources.images

Should contain URL field as application data URL with suffix receipt. For example, if the application data URL is retail.site.owned.persons, the URL in the dictionary item should be retail.site.owned.persons.receipt

#### Items

The screenshot shows a web-based configuration window titled "System resources - Images". At the top, there are three buttons: "Save" (blue), "Remove" (orange), and "Cancel" (white). Below these buttons, there are three main sections:

- Name:** A text input field containing the text "Receipt for retail pharmacy application".
- Additional information:** A larger text input field, currently empty.
- URL:** A text input field containing the text "retail.site.owned.persons.receipt".

Each text input field has a small icon in the bottom right corner, likely for clearing the field. The URL field is highlighted with a yellow background.

Figure 8 Application's receipt

### Files uploaded

Should be in docx format contains EL expressions.
